

# WATER BATH

## Outfitting CC

FOR A CIRCULAR SIZE GRADER

### FEATURES

- Reduces breakage due to age-related fragility.
- Optimises the yield

### TECHNICAL FEATURES

- Output water baths (3 or 4 depending on the size grader model)
- The circulation bath is placed on the ground, equipped with a submerged pump with float
- All the necessary piping

### OPERATION

- Once it has been graded, the asparagus is transferred to the water baths.
- The water circulation system keeps the asparagus moving, with around 15 kg of asparagus per water bath.
- Each water bath includes an inclined crate holder for easy loading.

### MAINTENANCE :

### MAINTENANCE

- The equipment is made entirely from stainless steel.
  - Clean water wash.
- The water should be changed and the baths rinsed daily.
- The system should be purged at the end of the season (ice!).

### OUTPUT

- Optimised with 15 kg of storage per bath.
- CC XXL 3S: up to 400 kg/h with 2 operators at the input + 1 or 2 sorting.
- CC XXL 4S: up to 200 kg/h with 1 operator at the input + 1 sorting.

### SIZE

- CC XXL 3S + water baths: 2.70 m x 3.30 m
- CC XXL 4S + water baths: 3 m x 3.50 m
