

Option : Adaptable dimensions

FEATURES

- To guarantee high-quality and fresh asparagus
- Single cell, autonomous and robust, easily movable.
- Easy to use : one unique loading of the pallet (1200 x 1000 x 1800)

TECHNICAL FEATURES

- Power supply : 230/400 V 32 A
- City water supply to fill in and maintain the level
- Automatic control for ice thickness
- 2 separate exchangers using R449a fluid

OPERATION

- Ice production system with accumulation at night to reduce electricity consumption.
- Iced water sprayed in a closed-circuit by two immersed pumps, on three faces of the pallet
- Tight closing damper by roller shutter

OUTPUT

- Cooling period, about 45 mn to get the asparagus from 18°C down to 4° c (65° F to 40°F)
- Capacity : about 600 Kg/hour
- Total height of the pallet : 1.80 m

SIZE

- Width : 3.05 m
- Depth : 1.50 m
- Overall height : 3 m
- Weight around : 1 T

MAINTENANCE

- Weekly cleaning (according to soiling)
- Easy drainage through large access trap door.
- Annual inspection of cooling sets
