

Designed to sort oysters and other shellfish, this extremely stable machine does not need to be fixed down.

FEATURES

- The stainless steel gratings are all interchangeable for unparalleled sorting.

TECHNICAL FEATURES

- Power supply: 220/240 V, single phase
 - Power: 1.5 kW
 - Electronic speed control

OPERATION

- Oysters and other shellfish are sorted through different layered gratings using an eccentric mechanism.
- There is a release chute at the end of each grating to transfer the oysters to belts, pouches or waste containers.
- This model features 2/3 or 4 gratings, which can be easily interchanged from above.
 - Washing tunnel (optional)
 - Rubber gratings (optional)

OUTPUT

- The rate can be adapted to suit any type of shellfish thanks to the electronic speed control.

SIZE

- Length: 2800 mm
- Width: 1100 mm
- Height (not raised): 1100 mm

MAINTENANCE

- The machine is robust and made entirely from stainless steel.
