

This machine allows you to separate mussels from the nets used for cultivation on pilin

FEATURES

- Separating mussels from their cultivation nets
- Rotating central cone system (front/rear, automatic or manual)

TECHNICAL FEATURES

- Power supply: 380 V, three phase
- Hydraulic Unit Power: 5.5 kW
- Hydraulic geared motor

OPERATION

- Individual mussel separation with prewashing
 - Rotating central cone
- Inner tank with grooved lining and fixed cones
- Mussels collected in containers or modular inclined conveyors
 - Secure access platform for net removal
- Placed after a container emptying machine and before a scrubbing machine (BG3000/3500/4000)

OUTPUT

- Up to 7 tonnes/hour.

SIZE

- Length: 1270 mm
- Width: 1270 mm
- Height: 2060 mm

MAINTENANCE

- The machine is robust and made entirely from stainless steel
- Cone driven by a hydraulic geared motor: very low maintenance
