

This machine is designed to package shellfish into pouches or bags according to a specific predefined weight.

FEATURES

- This machine transfers shellfish into pouches/baskets/mesh bags according to a set weight (1 kg to 20 kg).

TECHNICAL FEATURES

- Power supply: 220 V, single phase
- Power: 0.7 kW

OPERATION

- A precise and powerful machine.
 - Electronic speed control with potentiometer.
 - Two cleated conveyor belts.
- The shellfish are raised on two cleated conveyor belts (one large + one small to manage the weight) equipped with a speed control and then fall into a bucket.
- The cycles are determined by setting a specific weight. The load can be emptied by passing a finger in front of an infrared sensor, which causes the hatch to open.

OUTPUT

- Up to 10 x 5 kg/minute
- Weighing accuracy: +/- 20 g (depending on the speed of the belt and the transition from high speed to low speed).

SIZE

- Length: 2400 mm
- Width: 1000 mm
- Height: 2000 mm

MAINTENANCE

- The machine is robust and made entirely from stainless steel.
- Two PVC cleated belts with stainless steel staples.
