

FLASH'CORDE

This device lets you wrap your ropes around the pilings without getting off the boat

FEATURES

- A simple yet effective patented machine.
- Wraps ropes of mussels around pilings in the sea.
- No more tidal constraints.

TECHNICAL FEATURES

None

OPERATION

- Used on board the boat.
- Attaches the rope and cone in a single action (if the head of the piling is visible).
- The rope is fixed and unrolled from the bottom up.
- The system allows for early seeding, thereby improving the quality of the mussels.

OUTPUT

- Time per piling: under a minute.

SIZE

- Size of the sock depends on the height of the pilings.
- Suitable for 90 x 90 mm or 100 x 100 mm square pilings.

MAINTENANCE

- Stainless steel and aluminium machine
