

FEATURES

- Quality washing from above and below.

TECHNICAL FEATURES

- 8 pipes: Ø 25 mm
- Water flow: 20 m3/hour
- Pressure: 3.5 bars
- Power supply: 220/240 V, single phase as standard
- Motor power: 0.25 kW
- With electronic speed control

OPERATION

- The hopper can have a smaller or larger capacity (usually fed by a container emptying machine).
- Featuring a stainless steel mesh belt (600 mm wide as standard), hollow-shaft geared motor and electronic speed control.
- The shellfish are washed from above and below by water jets.
 - They are then transferred into pouches/baskets/bags.
- Water and waste is continuously evacuated by way of the recovery system at the bottom.
- Pouch/basket/bag and pump holder (optional).

OUTPUT

- Hopper capacity: 150 kg as standard.

SIZE

- Length: 1800 mm
- Width: 1000 mm

MAINTENANCE

- The machine is robust and made entirely from stainless steel.
- The pipes are easy to remove for cleaning (4 butterfly screws).
