

LHE 12/25

Designed to clean oysters and other shellfish, this machine includes two wheels to make it easy to move.

FEATURES

- Quality cleaning thanks to its water-filled hopper.

TECHNICAL FEATURES

- 12 Pipes: Ø 25 mm
- Water flow: 30 m³/hour
- Pressure: 3.5 bars
- Power supply: 220/240 V, single phase as standard
- Motor power: 0.25 kW
- With electronic speed control

OPERATION

- The watertight hopper (not included with the LH 8 or 12/25) is always filled with water.
- The hopper can have a smaller or larger capacity (450 kg as standard, usually fed by a container emptying machine).
- Featuring a stainless steel mesh belt (600 mm wide as standard), hollow-shaft geared motor and electronic speed control.
- The shellfish are washed from above and below by water jets, before being transferred into a submerged sorting machine, for example.
- Pouch/basket/bag and pump holder (optional).
- Water and waste is continuously evacuated by way of the siphon system at the bottom.

Rendement

- Hopper capacity: 450 kg as standard.

SIZE

- Length: 2300 mm
- Width: 1100 mm

MAINTENANCE

- The machine is robust and made entirely from stainless steel.
- The pipes are easy to remove for cleaning (4 butterfly screws).
