

MYTI ROLL LT1700/LT2200

This machine, equipped with a slatted drum, is designed to wash mussels and eliminate most of the parasites that may be stuck to them.

FEATURES

- Effective cleaning and removal of durable parasites such as barnacles.

TECHNICAL FEATURES

- Power supply: 220/240 V, single phase/50 Hz
Power: 3.5 kW

OPERATION

- Uses the rotation of a slatted cylinder and a shaft with stainless steel fingers, moving in opposite directions, to stir the mussels together.
- Options: weight sensors to regulate the input.

OUTPUT

- Depends on the condition of the product
- Very dirty mussels: 400 kg/h to 600 kg/h or 600 kg/h to 800 kg/h
- Easy-to-clean mussels: 3T/h

SIZE

- Length: 2900 or 3400 mm
- Width: 1100 mm
- Height: 2100 mm

MAINTENANCE

- A very simple machine.
- Required daily rinsing.
- Should be greased regularly.
