

FEATURES

- The unit uses **450 to 550 L of water** per day.

It therefore requires **30 to 35 times less water** over 4 hours of use.

TECHNICAL FEATURES

- Power: 1.1 kW or 1.5 kW
- Power supply: 220 V, single phase

OPERATION

- 3 compartments with filter screens.
- 3 drainage valves.
 - Pump.
 - Sand filter.
- Electric controls.

OUTPUT

- Closed circuit; unit filled once a day.

SIZE

- Length: 1.25 m or 1.50 m
 - Width: 0.60 m
 - Height: 0.63 m

MAINTENANCE

- The equipment is made entirely from stainless steel.
- The pump should be purged at the end of the season (ice).
- The filters and inlet filter must be cleaned as soon as they clog.
- The water in the unit should be changed every day.
