

# TWO-WAY

## WEIGHING/BAGGING MACHINE

This machine is designed to package oysters, mussels or other shellfish.

### FEATURES

- The machine includes two weighing heads.
- various shellfish packaging methods.
- High rate.

### TECHNICAL FEATURES

- Power supply: 220 V, single phase
- Electronic speed control

### OPERATION

- Weighing and bagging oysters (or other shellfish).
  - Placed after a sorting belt.
- The oysters are transported on a two-way belt.
- The direction can be changed once the desired weight has been reached in order to fill the opposite pouches/baskets/bags.
- The machine can be integrated with an automatic basket feeding and removal system consisting of a roller conveyor on each side of the filling areas.
  - This option makes it easier to manage both full and empty baskets.

### OUTPUT

- Weighing accuracy: +/- 20 g.

### SIZE

- Length: 1600 mm
- Width: 650 mm
- Height: 850 mm above the belt

### MAINTENANCE

- The machine is made entirely from stainless steel.
